PROJECT

FileMiner App (Android | Java)

A full-featured file miner app with smart storage and file handling.

- Built a file miner that visualizes storage usage and categorizes files by type (Photo, Video, Audio, Document, Others).
- Enabled advanced search with match types, case sensitivity, and folder exclusion for precise results.
- Integrated duplicate file detection with options to show/hide duplicates, perform bulk actions (delete, move, share, select all), and sort files by name, size, or time with toggleable order and file path visibility.
- mplemented hidden file access, media previews, and support for external app launches.

TextUtil's Web App (React.js)

A utility web app for transforming and analyzing text efficiently.

- Performs text transformations: convert case, copy, clear, remove extra spaces, and change fonts.
- Real-time alerts and notifications on user actions.
- Light/Dark mode toggle enabled.
- Live Demo:- TextUtils
